<b>Deed/Land Use Restrictions:</b>	Nonresidential

**Project Description:** The company has been a bulk oil storage and distribution center since 1928, and prior to that, the site was agricultural. A study of conditions at the site indicated that contamination from daily operations of semi-volatile organic compounds was limited to the soil. Contaminated soil was excavated and placed in an approved landfill. At the conclusion of the project, soil samples collected from the remediated areas indicated that conditions at the site were below Tier II Nonresidential cleanup levels.
